

Independent Quality & Quantity Inspection Company

COMPANY PROFILE

UNITEAM have come a long way by

providing **QUALITY & QUANTITY**

INSPECTION SERVICES to satisfy our

CUSTOMERS NEEDS & WANT with

aim to become the **BEST INSPECTION**

COMPANY in **PAKISTAN.**

UNITEAM was established in 1989, as an independent inspection company with a motive to provide third party Quality Assurance & Quality Control (QA/QC) inspection services in Pakistan & also abroad through our affiliates.

Ever since of our inception, we are growing and has built up its reputation among various industries & commodity traders in Pakistan & abroad. In line with the latest technological advancements, mobility & global requirements we are considered to be among the leading inspection companies in Pakistan.

We conducts third party Pre / Post Shipment Inspections & sampling for Quality & Quantity Assurance, Superintendence for Loading & Unloading Dry & Liquid Bulk Cargoes, General Cargoes, Plants & Machinery including containers & containerized cargoes.

UNITEAM is accredited / approved by:

- ***Pakistan Standard Institution, PSI, Govt of Pakistan – For the Inspection of Foods, Agriculture, Textiles, and Chemicals & Mechanical Manufactured Products.***
- ***ISO 9000:2008***
- ***Oil & Gas Regulatory Authority, OGRA – For the Inspection of LPG Installation***
- ***Pak PWD, Govt. of Pakistan – For Storage Tanks Calibration***
- ***Institute of International Container Lessors***
- ***Federal Boiler Board, Pakistan – For Inspection of Boiler***
- ***Weight & Measure Dept, Govt of Sindh – For Tank Lorries Calibration***

UNITEAM is a service oriented Organization and in order to provide prompt, efficient and professional services to our Clients, we have developed three core operational departments, they are:

INDUSTRIAL & MANUFACTURE

FOOD & AGRICULTURE

MARINE & CONTAINER

The image displays three service categories in a collage format. Each category is represented by a photograph and a red text box. The 'INDUSTRIAL & MANUFACTURE' category shows a large industrial facility with numerous pipes and storage tanks. The 'FOOD & AGRICULTURE' category features a collage of various agricultural products including coffee beans, corn cobs, and wheat stalks. The 'MARINE & CONTAINER' category shows a large industrial ship or offshore platform on the water.

SPECIALIZED SERVICES INLCUDE:

- STORAGE TANKS CALIBRATION**
- STORAGE TANKS PROFILE SURVEY**
- STOCKPILE VOLUMETRIC SURVEY**
- CONTAINERS CSC VALIDATION SURVEY BY IICL INSPECTOR**

Our Services

INDUSTRIAL & MANUFACTURE

- Storage tanks inspection
- Storage tanks calibration
- Inspection of pressure vessels, Boilers, Heat Exchangers
- Construction supervision of storage tanks.
- Fabrication & erection inspection of storage tanks, Steel structure, LPG road tankers, LPG Cylinders.
- Conventional NDT Services including UT, MT, PT & RT.
- Mill inspection & site supervision of boiler piping, Pipe Line and coating.
- Welding Inspection, Reviewing of WPS, Issuance of PQR & Welders Qualification
- Sand blasting & painting inspection.
- Laboratory Material Testing
- Lifting & heavy equipment's inspection
- Third party inspection of Mechanical & Electrical equipment's.

MARINE & CONTAINER

- Draught Survey
- Bunker Survey
- Cargo Damage / Condition Survey
- Hatch Sealing / Unsealing Survey
- Third Party Damage Survey
- Ship / Shore Personal Injury Survey
- Cargo Spaces / Hold Fitness Survey
- Break Bulk Survey
- On-Hire / Off Hire Survey
- Crane / Cargo Gear Damage Survey
- Demolition /LDT Survey
- Pre-Purchase Survey
- Voyage Performance
- Hull & Machinery Survey
- Vessel Grounding Survey
- Pre-Shipment Survey
- Container Inspections
- Cargo Measurement Survey
- Containers CSC Validation Survey

COMMODITY

- Commodity Sampling
- Lab Testing Analysis
- Quality Inspection
- Quantity Inspection
- Loading Supervision
- Discharging Supervision
- Container Fitness Inspection
- Container Vanning /De Vanning Survey

STORAGE TANKS CALIBRATION

where every drops matter...

UNITEAM is pioneered in introducing state of the art technology – E.O.D.R & using the latest methodology for the calibration of storage tanks.

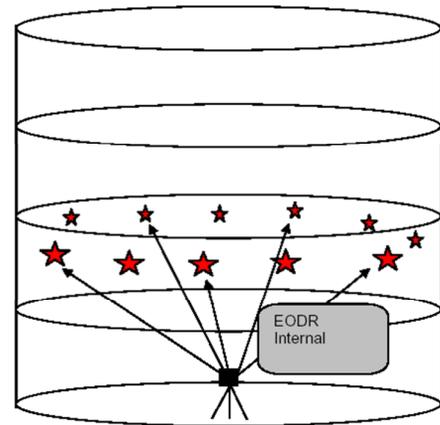

This technology ensures the highest accuracy & reduces the uncertainty margin to within $\pm 0.05\%$, which was very high in previous methods used for this purpose.

It is the worldwide recognized, precise, safer & easier to perform & can be perform in real time.

Today UNITEAM is a very well established name in this domain and rendering services from last 12 years to almost all major oil refineries, oil & gas storage plants & oil marketing companies across Pakistan.

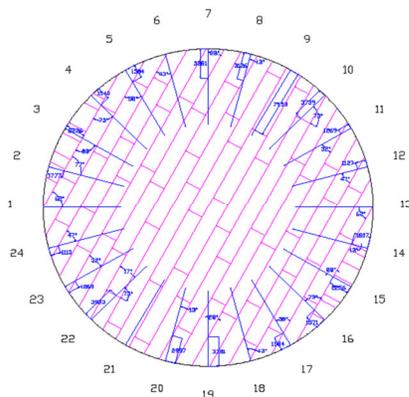

UNITEAM can also calibrate the Prover tanks of various capacities using its master Prover.

Additional Services

In addition of tanks calibration, UNITEAM have extended their services to include “*Tank Settlement and Roundness Survey*” reports for vertical upright cylindrical tanks subject to additional charges.

This survey is critical for Decisions making about expensive tank repairs, particularly floor replacement and foundation repairs, may hinge on the measurements taken during a settlement survey.

our Specialized Services

STOCKPILE VOLUME SURVEYS

no assumption but accuracy...

UNITEAM also introduces the stockpile volume surveys of various commodities such as Coal, DAP, Urea etc by using the combination of technology such as:

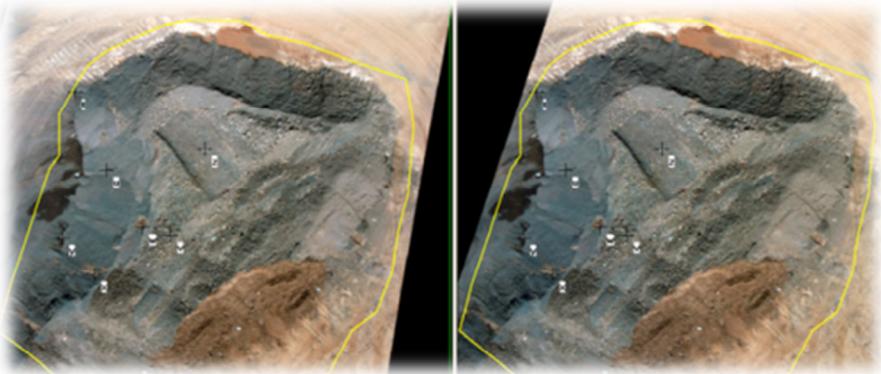

- TOTAL STATION
- PHOTOGRAMMERTY
- LASER RANGEFINDER

These are the latest as well as the state of the art technologies used globally for the accurate determination of the stockpile.

It has always been a problem for the companies to know the exact quantum of their stockpiles and most companies still use obsolete techniques which are very much a guess work with no accurate determination of the volume.

UNITEAM ensure highest accuracy with uncertainty margins within 2% depending upon the shape and accessibility of the piles.

Our Affiliations

GEOCHEM LABORATORIES

International Independent
